

# Talarolutin D

Cat.# BLK-1530

## Structure

**Origin:** Talaromyces sp.

**CAS Registry Number:** 1904635-42-2

**Appearance:** off white solid

**Molecular Formula/ Weight:** C<sub>21</sub>H<sub>28</sub>O<sub>5</sub>=360.45

**Purity:** >95.0% by HPLC

**Solubility:** Sol. in 1mg/ml ethanol, methanol, DMSO

### Background Information:

Talarolutin D, tetracyclic meroterpenoid antibiotics, is isolated from *Talaromyces minioluteus*.

### Handling and Storage:

Store at -20°C.

### References:
